SKILLS

React | Angular | NextJs | Redux | Zustand | Tailwind | Vite | NodeJs | Springboot | JPA/Hibernate | Kafka | REST API | Docker | Kubernetes | Java | MySQL | MongoDB | C++ | Python | Operating System

PROFESSIONAL EXPERIENCE

Cars24 , SDE-II

Sep 2024 – Jan 2026

- Led development of partner onboarding and loan disbursement workflows, reducing manual processing time by ~30% and improving onboarding turnaround.
- Built Holdback Management system with Maker-Checker workflow, RBAC, and lifecycle state management, improving approval accuracy and reducing operational errors by ~25%.
- Implemented RBI compliance features (PAN masking, consent management, CIBIL expiry handling), ensuring 100% compliance and preventing regulatory risks.
- Integrated Google Analytics, enabling data-driven decisions that improved user engagement by ~15%.
- Refactored UI components and optimized workflows, reducing page load time by ~20% and improving internal user productivity.
- Executed zero-downtime data migration for critical systems handling thousands of records, ensuring uninterrupted business operations.
- Resolved high-priority production issues, reducing incident resolution time (MTTR) by ~40% and improving system reliability.
- Mentored 2–3 interns, improving task delivery efficiency and reducing review cycles.

Lendingkart , SDE-I

Jan 2022 – Sep 2024

- Developed loan agreement generation system using Angular and Node.js, reducing manual effort by ~50% for operations team.
- Built Ask Management System using React.js and Spring Boot, handling 1000+ monthly queries and improving response turnaround by ~35%.
- Streamlined lender onboarding workflows, reducing onboarding time by ~25% and improving scalability.
- Delivered features and fixed bugs across multiple dashboards, improving performance metrics (load time reduced by ~15%) and enhancing user experience.

HummingWave Technologies , SDE-I

Sep 2021 – Jan 2022

- Developed responsive web applications using Next.js, improving mobile usability and increasing engagement by ~20%.
- Built reusable React components and optimized performance in SmartKarrot project, reducing re-rendering and improving UI responsiveness.
- Integrated Salesforce using Lightning Web Components and Apex, enabling seamless data flow and reducing manual data handling efforts by ~30%.

EDUCATION

Bachelor of Technology - Computer Science and Engineering,

Jul 2017 – Jun 2021 | Gorakhpur, India

Madan Mohan Malaviya University of Technology

PROJECTS

Untrash

- Built an analytics platform for eco-friendly product insights, enabling users to evaluate sustainability metrics across products.
- Developed responsive and performant UI using React.js and Tailwind CSS, improving page load speed by ~25%.
- Designed reusable components and optimized state management to enhance scalability and maintainability.

GoogleKeep-Clone

- Developed a full-stack note-taking application inspired by Google Keep using React.js and Spring Boot.
- Engineered backend services using Java, Spring Boot, Hibernate, and MySQL to support scalable data storage.
- Designed and implemented REST APIs for CRUD operations, supporting real-time data updates and seamless user interactions.
- Implemented features like note creation, editing, deletion, and search, improving usability and user experience.
- Implemented backend using Java, Hibernate, and MySQL.
